CAREER OBJECTIVE

Recent 2026 graduate (B.Tech, Computer Science) with hands-on experience in network security, vulnerability assessment, SIEM/log analysis, threat detection, incident response, and AI-assisted security workflows using Claude AI. Seeking an entry-level SOC Analyst / VAPT role to help protect organisational assets in live security operations environments.

TECHNICAL SKILLS

Cybersecurity: SIEM, Log Analysis, Intrusion Detection, Threat Analysis, Incident Response, Vulnerability Assessment, Network Security, Penetration Testing, OWASP Top 10, Access Control, Secure SDLC

Security Tools: Kali Linux, Wireshark, Burp Suite, Scapy, Nmap

AI Tools: Claude AI (prompt engineering, automated research, threat-intel analysis, report & documentation generation)

Programming & Scripting: Python, HTML, CSS, JavaScript

Concepts: TCP/IP, DNS, HTTP/S, Packet Analysis, System Hardening, Data Integrity, Role-Based Access Control (RBAC)

WORK EXPERIENCE

Cyber Security Intern – Codec Technologies Pvt. Ltd.

Mar 2026 – Apr 2026

AICTE & ICAC Approved Internship Program (Remote)

- Completed a 1-month industry-recognised Cyber Security internship, gaining hands-on exposure to security operations, tools, and best practices.

Cyber Security Virtual Intern – ShadowFox

Apr 2026

One-Month Virtual Internship (Remote)

- Completed a one-month virtual internship in Cyber Security, demonstrating exceptional performance across assigned security tasks.

CET Exam Server Manager

Mar 2024 – May 2024

Government Polytechnic College, Nanded, Maharashtra, India

- Administered and hardened server infrastructure for government CET examinations, maintaining 100% uptime and zero data breaches across all sessions.
- Configured access control policies and user permissions for exam staff, reducing unauthorised access risk for 500+ concurrent users.
- Performed real-time log analysis and monitoring, detecting and neutralising 3+ security incidents before they impacted exam continuity.
- Collaborated with a 5-member technical team to resolve critical server issues under time-sensitive exam conditions, achieving zero downtime.

PROJECTS

Network Traffic Analyser

2024

Python, Scapy, Wireshark, Network Protocols

- Built a real-time packet capture and analysis tool using Python and Scapy, enabling anomaly detection across TCP/UDP, DNS, and HTTP traffic.
- Implemented automated flagging of suspicious flows and intrusion attempts, reducing manual inspection effort by an estimated 60%.

Secure Web Application

2024 – 2025

Python, HTML, CSS, JavaScript, Burp Suite

- Developed a full-stack web application with security-first architecture, implementing secure authentication, session management, and RBAC.
- Applied all OWASP Top 10 mitigations throughout the SDLC and executed penetration testing with Burp Suite, remediating 10+ security weaknesses pre-deployment.

Smart Farming Using Object Detection

2025 – 2026

Python, Machine Learning, Object Detection – Final Year Project

- Engineered an AI-powered real-time crop and pest detection system using object detection models trained on agricultural image datasets, surpassing baseline model accuracy.

CERTIFICATIONS

- ShieldsUp: Cybersecurity Job Simulation – Mastercard via Forage (2024): Phishing analysis, security awareness, incident response.
- Cyber Security Job Simulation – Deloitte via Forage (2024): Threat intelligence, log analysis, security investigation.
- Cybersecurity Basics – Infosys Springboard (2024): Network security, threat landscape, defensive security practices.
- Python Basics – OnWingspan (2024): Python scripting fundamentals.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering

2026

Dr. Babasaheb Ambedkar Technological University (DBATU), Lonere — M.B.E. Society's College of Engineering, Ambajogai
